**Prof./Dr. Saraju Mohanty
University of North Texas, USA.**

Outline

- Smart Healthcare – Broad Introduction
- Smart Healthcare – Challenges Against Sustainability
- Selected Cybersecurity Solutions for IoT/CPS
- Drawbacks of Existing Cybersecurity Solutions of IoMT/H-CPS
- Security by Design (SbD) Principle
- Security by Design (SbD) Example Solutions
- Trustworthy Pharmaceutical Supply Chain
- Trustworthy Medical Prescription
- Conclusion

Smart Healthcare – Broad Introduction

Sustainable Smart Healthcare: Prof./Dr. Saraju Mohanty

Human Body and Health

Human Body

- From an engineering perspective - Human body can be defined as a combination of multi-disciplinary subsystems (electrical, mechanical, chemical ...).

Health

- Human health is a state of complete physical, mental and social well-being.

Healthcare → Smart Healthcare

The use of information and communication technologies (ICT) to improve healthcare services.

Smart Healthcare – Challenges Against Sustainability

Sustainable Smart Healthcare: Prof./Dr. Saraju Mohanty

Massive Growth of Sensors/Things

Challenges of Data in IoT/CPS are Multifold

AI/ML Modeling Challenges

Machine Learning Issues

Source: Mohanty ISCT Keynote 2019

High Energy Requirements

High Computational Resource Requirements

Large Amount of Data Requirements

Underfitting and Overfitting Issue

Class Imbalance Issue

Fake Data Issue

Attack on Training Process

Deep Neural Network (DNN) - Resource and Energy Costs

TRAIN: Iterate until you achieve satisfactory performance.

Needs Significant:

- Computational Resource
- Computation Energy

PREDICT: Integrate trained models into applications.

Limited Computational Capability
Limited Battery Life

Needs:

- Computational Resource
- Computation Energy

AI/ML – Cybersecurity Issue

Source: D. Puthal, and S. P. Mohanty, "[Cybersecurity Issues in AI](#)", *IEEE Consumer Electronics Magazine (MCE)*, Vol. 10, No. 4, July 2021, pp. 33–35.

Wrong ML Model → Wrong Diagnosis

Source: <https://www.healthcareitnews.com/news/new-ai-diagnostic-tool-knows-when-defer-human-mit-researchers-say>

Smart Healthcare - Security Challenges

Selected Smart Healthcare Security/Privacy Challenges

- Data Eavesdropping
- Data Confidentiality
- Data Privacy
- Data Integrity
- Identity Threats
- Unique Identification
- Personal Privacy
- Location Privacy
- Access Control
- Device Security

Source: P. Sundaravadivel, E. Kougianos, S. P. Mohanty, and M. Ganapathiraju, "Everything You Wanted to Know about Smart Health Care", *IEEE Consumer Electronics Magazine (CEM)*, Volume 7, Issue 1, January 2018, pp. 18-28.

Attacks on Wearable Devices

Implantable Medical Devices - Attacks

- The vulnerabilities affect implantable cardiac devices and the external equipment used to communicate with them.
- The devices emit RF signals that can be detected up to several meters from the body.
- A malicious individual nearby could conceivably hack into the signal to jam it, alter it, or snoop on it.

Source: Emily Waltz, Can "Internet-of-Body" Thwart Cyber Attacks on Implanted Medical Devices?, *IEEE Spectrum*, 28 Mar 2019, <https://spectrum.ieee.org/the-human-os/biomedical/devices/thwart-cyber-attacks-on-implanted-medical-devices.amp.html>.

Fake Data and Fake Hardware – Both are Equally Dangerous in CPS

AI can be fooled by fake data

AI can create fake data (Deepfake)

Authentic
An implantable medical device

Fake

Authentic
A plug-in for car-engine computers

Fake

Fake is Cheap – Why not Buy?

Health Insurance Portability and Accountability Act (HIPPA)

HIPPA Privacy Violation by Types

Cybrsecurity Solution for IoT/CPS

Smart Healthcare Cybersecurity

Insulin Delivery System

Rolling Code Encoder in Remote Control

Rolling Code Decoder in Insulin Pump

Source: Li and Jha 2011; HEALTH 2011

Security Attacks

Blockchain in Smart Healthcare

Nonvolatile Memory Security and Protection

Source: <http://datalocker.com>

Nonvolatile / Harddrive Storage

Hardware-based encryption of data secured/protected by strong password/PIN authentication.

Software-based encryption to secure systems and partitions of hard drive.

Some performance penalty due to increase in latency!

How Cloud storage changes this scenario?

Drawbacks of Existing Cybersecurity Solutions

IT Cybersecurity Solutions Can't be Directly Extended to IoT/CPS Cybersecurity

IT Cybersecurity

- IT infrastructure may be well protected rooms
- Limited variety of IT network devices
- Millions of IT devices
- Significant computational power to run heavy-duty security solutions
- IT security breach can be costly

IoT Cybersecurity

- IoT may be deployed in open hostile environments
- Significantly large variety of IoT devices
- Billions of IoT devices
- May not have computational power to run security solutions
- IoT security breach (e.g. in a IoMT device like pacemaker, insulin pump) can be life threatening

Incorporation of Cybersecurity of Electronic Systems, IoT, CPS, needs Energy, and hence affects Performance.

H-CPS Cybersecurity Measures is Hard

- Energy Constrained

Pacemaker
Battery Life
- 10 years

Neurostimulator
Battery Life
- 8 years

- Implantable Medical Devices (IMDs) have integrated battery to provide energy to all their functions → Limited Battery Life depending on functions
- Higher battery/energy usage → Lower IMD lifetime
- Battery/IMD replacement → Needs surgical risky procedures

Source: C. Camara, P. Peris-Lopez, and J. E.Tapiadura, "Security and privacy issues in implantable medical devices: A comprehensive survey", *Elsevier Journal of Biomedical Informatics*, Volume 55, June 2015, Pages 272-289.

Cybersecurity Attacks – Software Vs Hardware Based

Software Based

- Software attacks via communication channels
- Typically from remote
- More frequent
- Selected Software based:
 - Denial-of-Service (DoS)
 - Routing Attacks
 - Malicious Injection
 - Injection of fraudulent packets
 - Snooping attack of memory
 - Spoofing attack of memory and IP address
 - Password-based attacks

Hardware Based

- Hardware or physical attacks
- Maybe local
- More difficult to prevent
- Selected Hardware based:
 - Hardware backdoors (e.g. Trojan)
 - Inducing faults
 - Electronic system tampering/ jailbreaking
 - Eavesdropping for protected memory
 - Side channel attack
 - Hardware counterfeiting

Source: Mohanty ICCE Panel 2018

Cybersecurity Solutions – Software Vs Hardware Based

Software Based

- Introduces latency in operation
- Flexible - Easy to use, upgrade and update
- Wider-Use - Use for all devices in an organization
- Higher recurring operational cost
- Tasks of encryption easy compared to hardware – substitution tables
- Needs general purpose processor
- Can't stop hardware reverse engineering

Source: Mohanty ICCE Panel 2018

Hardware Based

- High-Speed operation
- Energy-Efficient operation
- Low-cost using ASIC and FPGA
- Tasks of encryption easy compared to software – bit permutation
- Easy integration in CE systems
- Possible security at source-end like sensors, better suitable for IoT
- Susceptible to side-channel attacks
- Can't stop software reverse engineering

Security-by-Design (SbD) – The Principle

CPS Design - Multiple Objectives for Sustainability

Smart Cities
Vs
Smart Villages

Security by Design (SbD)

Embedding of security/privacy into the architecture (hardware+software) of various products, programs, or services.

Retrofitting: Difficult → Impossible!

Source: <https://teachprivacy.com/tag/privacy-by-design/>

Security by Design (SbD)

Source: https://iapp.org/media/pdf/resource_center/Privacy%20by%20Design%20-%207%20Foundational%20Principles.pdf

Security-by-Design (SbD) or Hardware Assisted Security (HAS) - Advantages

Hardware Cybersecurity Primitives

– HSM, TrustZone, TPM, and PUF

Hardware Security Module (HSM)

Trusted Platform
Module (TPM)

Keep It Simple Stupid (KISS) → Keep It Isolated Stupid (KIIS)

Physical Unclonable Functions (PUF)

Smart Healthcare – Trustworthy Pharmaceutical Supply Chain

Sustainable Smart Healthcare: Prof./Dr. Saraju Mohanty

Counterfeits in Healthcare

Source: GA-FDD (Government Analyst –Food and Drug Department) issues warning over “fake” drug on local market,

<https://www.inewsguyana.com/ga-fdd-issues-warning-over-fake-drug-on-local-market/>

Daflon 500 is used to treat gravitational (stasis) dermatitis and dermatofibrosclerosis

The original product:

- sold in a white box with blue borders
- contains sixty (60) 500mg tablets
- divided on four (4) silver blister packs, each containing fifteen (15) tablets

The fake product:

- sold in a white box with no border
- contains sixty (60) 500mg tablets
- divided on six (6) silver with blue blister packs, each containing ten (10) tablets

Fake Medicine - Serious Global Issue

- It is estimated that close to \$83 billion worth of counterfeit drugs are sold annually.
- One in 10 medical products circulating in developing countries are substandard or fake.
- In Africa: Counterfeit antimalarial drugs results in more than 120,000 deaths each year.
- USA has a closed drug distribution system intended to prevent counterfeits from entering U.S. markets, but it isn't foolproof due to many reason including illegal online pharmacy.

Smart Healthcare – Trustworthy Medical Prescription

Sustainable Smart Healthcare: Prof./Dr. Saraju Mohanty

E-Prescription System and Issues

- Single Point of Failure (SPOF)
- Data Security
- Privacy Concerns
- Interoperability Concerns (PDMP)
- System availability Issues

- Prescription Drug Monitoring Programs(PDMP) help mitigate prescription misuse and diversion
- Oversight of controlled substance prescriptions

Source: A. K. Bapatla, S. P. Mohanty, and E. Kouglanos, “[FortiRx: Distributed Ledger Based Verifiable and Trustworthy Electronic Prescription Sharing](#)”, in *Proceedings of the IFIP International Internet of Things Conference (IFIP-IoT)*, 2023, pp. 283–301, DOI: https://doi.org/10.1007/978-3-031-45882-8_19.

E-Prescription is the Need of the Hour

Reduced Fraud and Abuse

Blockchain Immutability Combats prescription fraud and abuse

Enhanced Security and Privacy:

Provides security and integrity of the medical data

Efficiency and Accuracy

Accuracy can be improved to reduce medication errors

Interoperability

Seamless data exchange between healthcare providers

Addressing Opioid Crisis

Prevents misuse and abuse of opioids

Statistics Source: <https://drugabusestatistics.org/prescription-drug-abuse-statistics/>

Prescription Drug Type	Annual Abusers	% Among Rx Abusers	% Among Americans
Painkillers	9.7 million	59.5%	3.43%
Opioids Alone	9.3 million	57.1%	3.29%
Sedatives	5.9 million	36.2%	2.08%
Stimulants	4.9 million	30.1%	1.73%
Benzodiazepine Alone	4.8 million	29.4%	1.70%
All Prescription Drugs	16.3 million	100%	5.76%

- 16M – 6% of Americans over the age of 12 abuse prescriptions in a year.
- 2M – 12% of prescription drug abusers are addicted.

Our FortiRx: Architecture Overview

Source: A. K. Bapatla, S. P. Mohanty, and E. Kougianos, "FortiRx: Distributed Ledger Based Verifiable and Trustworthy Electronic Prescription Sharing", in *Proceedings of the IFIP International Internet of Things Conference (IFIP-IoT)*, 2023, pp. 283--301, DOI: https://doi.org/10.1007/978-3-031-45882-8_19.

Conclusion and Future Research

Conclusion

- Healthcare has been evolving to Healthcare-CPS (H-CPS).
- Internet of Medical Things (IoMT) is key for smart healthcare.
- Smart healthcare can reduce cost of healthcare and give more personalized experience to the individual.
- IoMT/H-CPS has advantages but also has limitations in terms of cybersecurity; thus challenging to build sustainable healthcare.
- Medical device security is a difficult problem due to resource and battery constraints; thus challenge for sustainable H-CPS.
- Robust pharmaceutical supply chain is important for counterfeit-free medical supplies.
- Trustworthy e-prescription is key in H-CPS to ensure safe medication.
- Security-by-Design is critical for IoMT/H-CPS.

Future Research

- TinyML for smart healthcare that can run at user-end (edge/sensor) needs research.
- H-CPS requires robust data, devices, along with cybersecurity and privacy assurance to be sustainable and hence needs research.
- Security of IWMDs needs to have extremely minimal energy overhead to be useful and hence needs research.
- Integration of blockchain for smart healthcare need more research due to energy, computational overheads, and lack of scalability, associated with it.
- Robust Pharmaceutical Supply Chain needs research.
- Trustworthy Insurance Processing in H-CPS needs research.
- SbD research for IoMT/H-CPS application is needed.
